About Cieza

Cieza has a population of 36.000 inhabitants. It's located in the southeast of Spain and is the sunniest region in Spain with more than 300 sunny days per year. Cieza is the largest exporter of peaches in Europe. Our city is surrounded by beautiful nature such as the Segura River and many mountains.. the best time to visit Cieza is during the "Flowering" period from February to March.

Our School

Our school has 650 students ranging from 1 to 16 years old. The school has a Montessori kindergarten as well as infant, primary and secondary grades. We have considerable experience related to Erasmus projects and eTwinning. We are an eTwinning school and an accredited Erasmus+ centre, developing many projects, especially those linked with nature, sustainable development, sports and healthy living habits, languages and ICTs. We already have partners in many countries as Frances, Italy, Norway, Denmark, Poland, Croatia, Czech Republic, Sweden, Portugal, etc.

Projects

One of the most notable projects was reducing noise in cities. This project was developed with our partners from Norway, Poland and Denmark. It has achieved exceptional results and was presented to the European Environment Agency in Copenhagen.

We have developed other projects related to caring for the natural environment, saving water, green transport in Europe, water consumption and microplastics, sports and healthy living habits, safe internet for teenagers, etc.

Objectives

I. Looking for new partners in new countries.

Within our internationalization plan, we would like to establish new alliances with other countries to create positive synergies based on our common goals.

II. Introducing our school.

We are introducing our school, town and region to other schools in foreign countries in a cultural and international context of cooperation. We are always ready to receive new students here in our town.

III. Enrich our projects.

The main goal is to find common topics to develop and enrich our students through these processes. Erasmus + means more opportunities for the educational and social community.

If you are interested, please don't hesitate to contact us.
